

# Dog's NAILS Cutting

Keeping nail short is very important for many reasons. Besides it is very uncomfortable for your dog if the nails are too long. Sometimes it makes it a little easier to cut the nail while you are bathing your dog so that the nails are nice and soft. If you are not sure of yourself and do not know how to cut nail, file your dog's nail a little bit every time, after combing and brushing using a normal nail file. This will help keep the nails down.

A good blood stopper will help stop the bleeding
