

TOILET TRAINING

Toilet training starts from an early age as soon as puppies start crawling walking around in their playpen or box at that stage we place some newspaper or puppy pads in the box so that the puppies learn to do their business onto it and not onto their bedding. As the puppies get older they get more and more confident and with a bit of encouragement go onto the newspaper or puppy pads. From about the age of 6 - 8 weeks is the time to start teaching your puppy to go onto the grass. If you are living in an apartment or - other non-outdoor housing and don't have a grassy area for your puppy to go onto, a **indoor pet potty lawn** or something similar to that will help you. When teaching them how to do their business onto the grass always use a command word like get busy, go wee, or any other word you can think of. You can usually tell when a puppy 'wants to go' because he or she will look around anxiously, walk in circles and start sniffing in suitable corners looking for a place. This usually happens about 10 minutes after your puppy has eaten or had a drink. Now comes your cue to whisk your pet outside onto the grass no matter what the weather is like, always dry your dog off if it was wet outside so that he/she does not catch a cold or correspond the yucky feeling of being wet with going for a wee. If you need to use a indoor pet potty lawn or something of the same sort make sure to place it in a well vented area.

Always praise your puppy after he or she has done the job this is very important so that they get more and more confident that they have done the correct thing. But at the same token if your puppy / dog has done it's business inside tell them of straight away (not later) by saying NOUGHTY OUT and take them outside or onto the place where you want them to do their business. Make sure your always use the same exit door if you are taking your dog onto the grass. Again remember to praise your puppy after he has done his business. Being firm repetitive is one of the most important things you need to do when it comes to toilet training. If your dog had an accident inside please clean it up but never use pino clean cleaner this product smells for dogs like Cat pee.
