

Tendency to Dislocate Joints: Dogs

A tendency to dislocate joints and knee ligaments, i.e. their temporary displacement which causes complications with walking, is treated with: *Rhus toxicodendron 12x* in the mornings and *Chamomilla 6x* at night for three or four weeks. A repetition of this treatment some time later will often be indicated.

Hints, be aware of!

Owners shop while pets (Dogs) suffer!

"If it is 30C. out site, in 15 minutes that car's going to be up over 50C. in site the CAR" So a Dog. Particularly breeds with a short snout like pugs, shitzus, boxers, and bulldogs can die in less than seven minutes. So don't take the dog if you're going to have to leave it in the car. Owners who leave their pets in cars can be charged and fined up to \$50.000. So be aware!
