

TEETH

CLEANING

Dental care is just as important for your puppy as it would be for you. These days it is quite easy to take care of your puppies/dogs teeth.

- first you can try the natural way by giving your dog a
- knuckle or brisket bone to chew on.
- Secondly a nice dried cow hoof will be quite enjoyable
- If after all that your puppies teeth don't seem clean then try some of the many tooth brushes and pastes available for dogs in flavour that dogs prefer such as beef, chicken or liver these are available, from your pet store online or locally or from your vet. You can also use baking soda in very small amounts.

Please never use human tooth past on your dog, human tooth paste contain a product called Xylitol a sweetening agent that is toxic to dogs, this can make your dog very sick.

Remember if you don't clean your dogs teeth who will ? Help your friend retain that lovely white smile and stay healthy bad teeth can cause many different health hazards.
